SynC – C/C++ Quiz

A quiz is a qualitative as well as a quantitative juncture of assessing your know-how. This is a fantastic mixture of the level of quality and knowledge, which along with checking your knowledge also tests your skills acquired.

As far as it is concerned of C and C++, on one side where C is an imperative (procedural) language and like most imperative languages in the ALGOL tradition, C has facilities for structured programming and allows lexical variable scope and recursion. Whereas, on the other hand, C++ is a statically typed, free-form, multi-paradigm, compiled, general-purpose programming language and is one of the most popular programming languages which is implemented on a wide variety of hardware and operating system platforms.

For the same cause and with the same enthusiasm, we are here on the platform of Infotsav. Get yourself boost up, with the basics as well as the hidden lethal concepts of computer programming. And we guarantee, you are surely going to witness a new phase of concepts.

Timeline: 10th November, 2012

Rules

- There will be two rounds, namely 'Dennis Ritchie' Round for the 1st and 'Bjarne Stroustrup' Round for the 2nd.
- The participating teams must comprise of at most 3 members in each team.
- Each member of the team must be regular bonafide student of any Institute.
- The teams scoring maximum in the first round will qualify for the second and the final round.
- In any case, the whole rights are concerned with the organizers.
