ABV-Indian Institute of Information Technology and Management, Gwalior

Presents

witch hunt

witch hunt

Witch hunt, the debugging contest is not only about programming talent but also about applying the sheer knowledge to rectify errors . The challenge tests a programmer's ability to understand and respond to dissimilar codes. The art of rectification / debugging is difficult than conventional programming because it's not about what you know, it's about how much you know and how you apply those cognitive ideas to recognize errors and act upon them.

The event tests the programmer in areas of speed, intellect and understanding. A programmer stands nowhere if takes ages to understand and device an algorithm, hence it requires to comply! The ability to perceive the programming style different from one's own takes some doing and if you are up against the challenge, better get started by becoming a part of Witch Hunt.

rules

- Maximum Team size is 2.
- No late submissions will be entertained. (unless the time limit is extended).
- You aren't allowed to skip a question and return to it later.
- The Event is divided in two Phases
- Phase I - Preliminary Phase (Online)
- Phase II - Main Phase (At ABV-IIITM, Gwalior Campus)
- First Phase will consist of three levels:
- First level will consist of multiple choice questions (only one correct) with negative (-) marking.
- Second level will consist of multiple choice questions (one or more than one correct) with no negative (-) marking.
- Third level will consist of submit type questions with no negative (-) marking.
- Number of questions and duration will be disclosed at the time of contest.
- Any team which attempts to hack/deliberately crash the judging system will be immediately disqualified.
- The decision of the organizers in declaring the results will be final. No queries in this regard will be entertained.
